Natural Refreshing Drink for Summer

Blend of Herbal distillate and Fruit Juices, Which
compensate the loss of Water, Vitamins &
Minerals in the summer season and keeps the
body Cool, Fresh and Healthy.

PREFACE

Late Hakim Baqaullah Sahib was one of the most famous and well-known personalities in Iran. He was an expert in Unani medicine and held a high position in wisdom. Late Hakim Baqaullah Sahib came to India during the Mughal period and settled here. His children were then called 'Baqai Family'. Late Hakim Baqaullah was the possessor of many virtues. High temperament, self-control, modesty, pride and foresight were part of his personality.

Late Hakim Baqaullah Sahib was an expert in Unani medicine and possessed a terrifying personality. Whoever met him became his disciple. He also authored a book, Majmua Baqai, which is one of the most popular books in Unani medicine.

With the changing times, a government came to power in India which on the one hand introduced the English Allopathic System in the country and on the other hand hatched conspiracies against Unani medicine and tried its best to eradicate it. At that time, Late Hakim Ajmal Khan, Late Hakim Abdul Hameed and other eminent Hakims (of that period) not only benefited the people with their scientific and technical skills through Unani medicine but also foiled the conspiracies against Unani medicine.

After the independence of India, the British-style bureaucracy once again dominated, which played a major role in popularizing new therapies, but over time, the harmful effects of this treatment and its medicines (Side Effects) began to emerge, so today the sensitive section of the people is once again attracted to Unani medicine and other herbal remedies.

Before independence, Late Hakim Muniruddin Sahib used to be the beacon of the Baqai family, whose residence was in Mohalla Houz Qazi. He was succeeded by his son Late Hakim Sharifuddin Baqai and in 1930 he founded the Unani Medicine Center 'Baqai Pharmacy' from where Late Hakim Sharifuddin Baqai developed his knowledge, practice and medicine., benefiting people with prescription and other skills. He had a thorough knowledge of the pulse and people were convinced of the medicine he was diagnosing and prescribing. Late Hakim Sharif-ud-Din Baqai made his son Late Hakeem Jameel-ud-Din Baqai his successor due to illness in the last days of his life and he also introduced a number of

unique herbal formulas which were compiled after many years of scientific and practical experiments and observations which were in the possession of Late Hakim Jameel-ud-Din Sahib, which are safe and have been delivered to the people in various forms of medicines in the clinic for the last many years.

Late Hakim Jameel-ud-Din Baqai Sahib considered the responsibility given to him by his father and the precious treasure as an important responsibility of his life and gave it to the people as a doctor in the form of various medicines. Hakim Jameel-ud-Din Baqai completed his B.I.M.S. from Jamia Hamdard in 1974 following the instructions given by the Government of India to become a complete physician. In the light of ancient experiments and observations as well as modern education, as a physician and pharmacist, he has taught Unani medicine to the people for the last 20 years and this process is still going on today. Maintaining his family's legacy, his son Hakeem Muhammad Khubaib Baqai studied at the Government of India Certified College Ayurvedic and Unani Tibbiya College Delhi (B.U.M.S.) and then completed his M.D. and now is working as a physician and pharmacist under the patronage of Jameel-ud-Din Baqai.

Both of them have learned from their forefathers the valuable prescriptions, personal experiences, modern research and their scientific and practical hard work in contemporary specific diseases such as Diabetes Mellitus, High Blood Pressure. Successful and quick-acting drugs for skin diseases, arthritis, liver diseases, gastrointestinal tract and sexually transmitted diseases of men and women. Hakim Mohammad Khubaib Baqai and Mohammed Junaid Hasan have jointly set up Hakim Baqai's Medicare Private Limited Company in Delhi to provide this precious treasure and pure Unani medicine to the people. Mr. Muhammad Junaid Hassan completed his M.B.A Marketing and then Post Graduate Diploma in Operational Management (PGDOM) and is now working as a Marketing Patron in this company with his educational and experimental ideas. The treatment is not only to rid people of diseases but also to provide peace of mind and heart. All the medicines of this company are certified by G.M.P.

Why do we use Unani Medicine?

In today's fast paced life this question comes to the mind of more or less every patient. There are probably different reasons for this. Probably a factor as to why they're doing so slowly. This is why most people turn to Unani medicine when they are either not benefiting from other therapies or when other ailments do not cure their disease. In Unani medicine, treatment is based on the patient's overall condition, which eliminates the disease from the root.

What really sets Unani medicine apart from other therapies is that Unani medicine treats the root cause of the disease. The patient recovers moderately, and the disease is completely eradicated.

Unani medicine cures racial and ethnic diseases. And not only this, it shows its effect in a short time and eradicates diseases. This is an easy and cheap treatment while other treatments are expensive and not very effective.

Modern medicine today stands at a crossroads that is unable to respond to the diseases caused by the new economic and social environment while the modern generation and the world of humanity are looking for alternative therapies, now turning to Unani medicine in particular. Has been Leading Unani physicians and researchers explain the new generation's problems in Unani medicine. In particular, according to Hakim Mohammad Khubaib Baqai, there is a vast field of progress in Unani medicine which is moving towards its destination. Which can serve more human health than modern medicine. This treatment has more potential to exploit the disease partially and completely than modern treatment. That is why the whole world is recognizing this system. And in this particular treatment, the WHO has also expressed its preference and has declared Unani medicine as a component of health restoration that has the potential to eradicate the disease.

Note: Warning

This list is a guide for Unani medicine practitioners. Which medicine / product will be used for a disease depends on the decision of the physician. Patients should neither diagnose their own disease nor their own treatment.

In case of self-diagnosis and self-prescription,
Hakeem Baqai's Medicare Pvt. Ltd. will not be liable for any loss.
